10mm inside diameter

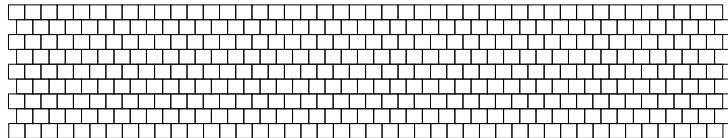

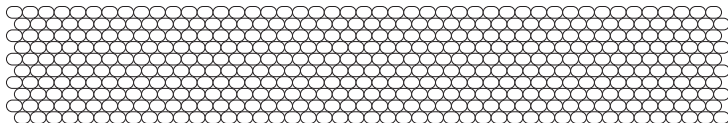

11mm inside diameter

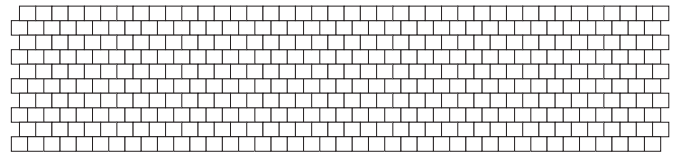

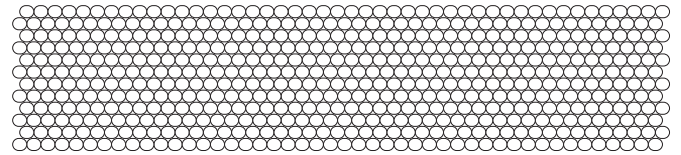

12mm inside diameter

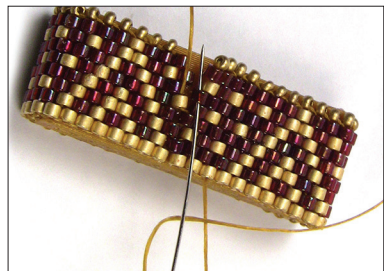

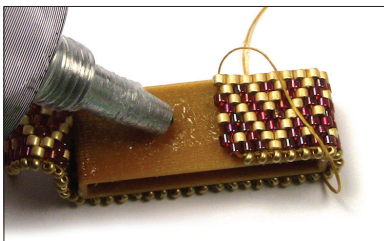

13mm inside diameter

Rectangular box clasp 28.5 x 3mm inside diameter

Oval clasp 26 x 7.75mm inside diameter

## IMPORTANT

- Magnets are strong and can cause injury if used improperly, they are intended for adult use only, keep away from children
- It is strongly recommended to use a safety strap and not to depend entirely on the magnet to keep the jewelry closed
- Check the polarization of the magnets before gluing them permanently, especially in larger clasps which may have two magnets
- Use strong non-waterbased glue such as E6000, Aleene's Ultimate, or Aleene's Glass and Bead
